

KOMALI KADIYALA

Python Developer | DataAnalytics & AI-ML Engineer

Nizampet, Hyderabad • 7396701643 • komalikadiyala17@gmail.com

[PORTFOLIO](#) [GITHUB](#) [LINKEDIN](#)

SUMMARY

Recent B.Tech graduate with hands-on experience in Machine Learning, Deep Learning, Data Analytics, Computer Vision, Python, Data Visualization. Published IEEE researcher, Top-12 National Hackathon Finalist, and internship experience in Data Analytics, Cybersecurity, and Full-Stack Development.

EDUCATION

B.Tech CSE(ARTIFICIAL INTELLIGENCE) | 8.22/10

2022 - 2026

Narasaraopeta Engineering College (JNTUK), Narasaraopet

Intermediate (MPC) | 911/1000

2020 - 2022

Jupiter Junior College, Guntur

X Standard | 597/600

2014 - 2020

Oxford High School, Narasaraopet

TECHNICAL SKILLS

- **Languages:** Python, SQL, JavaScript, HTML, CSS
- **Machine Learning:** Supervised Learning, Unsupervised Learning, Feature Engineering, Hyperparameter Tuning, Predictive Analytics, Model Evaluation
- **Deep Learning:** Neural Networks, MLP, LSTM, GRU, Computer Vision
- **Algorithms & Models:** Random Forest, XGBoost, K-Means Clustering, YOLOv8, Faster R-CNN, ARIMA, SVR
- **Libraries & Frameworks:** React.js, FastAPI, Scikit-learn, Pandas, NumPy, TensorFlow, Keras, OpenCV, Matplotlib
- **Data Analytics:** Data Cleaning, EDA, Data Visualization, Statistical Analysis, Power BI, Excel
- **Databases & Tools:** PostgreSQL, Firebase, Git, GitHub, Docker, REST APIs, OOP, Streamlit

INTERNSHIP EXPERIENCE

Python Full Stack Development Intern | Datavalley & APSCHE | Nov 2025 – Mar 2026

- Developed backend APIs and database-driven applications using Python, FastAPI, and PostgreSQL.
- Built authentication modules, dashboards, and RESTful services.

AI-Driven Data Analytics Intern | Datavalley & APSCHE | May 2025 – Jun 2025

- Conducted data preprocessing, visualization, exploratory analysis, and predictive modeling.
- Applied Python, SQL, Excel, and Power BI to solve analytics problems.
- Extracted meaningful insights and supported data-driven decision-making.

Cyber Security Intern | Supraja Technologies | May 2025 – Aug 2025

- Performed Web Application Vulnerability Assessment and Penetration Testing (VAPT).
- Built Python-based monitoring tools for threat detection and risk analysis.
- Analyzed security incidents and identified potential vulnerabilities.

PROJECTS [GITHUB](#)

Vineyard Yield Estimation using Deep Learning (IEEE Publication)

- Achieved 95.8% accuracy using YOLOv8, Faster R-CNN, and Multi-Input Neural Networks for vineyard yield estimation.
- Published research findings at IEEE IATMSI 2026 Conference.

Student Dropout Prediction System

- Achieved 98.40% accuracy using Random Forest, XGBoost, and Multi-Layer Perceptron models.
- Improved model performance through hyperparameter tuning and feature engineering.
- Developed Streamlit and Gradio applications for real-time predictions.

Stock Market Forecasting using HDFM and Deep Sequential Models

- Developed a hybrid forecasting framework using GRU, LSTM, ARIMA, SVR, Random Forest, and CEEMDAN.
- Processed 20,000+ stock market records from SSEC, SZI, and S&P 500 datasets.
- Achieved R^2 Score of 0.92 using GRU-based deep sequential learning.

AI Surveillance Platform (SMARTSECUREC3)

- Built an AI-powered CCTV surveillance system using YOLOv8, OCR, FastAPI, and PostgreSQL, earning a Top-12 National Finalist position among 750+ teams in the CCTV Surveillance Security & Forensics Hackathon 2.0.

ACHIEVEMENTS

- Top 12 National Finalist - CCTV Surveillance Security & Forensics Hackathon 2.0 for Smartsecurec3 (750+ applicants)
 - First Prize – 24-Hour Data Analytics Hackathon for Student Dropout Prediction
 - First Prize – Android Hackathon for Bride Belle Application
 - Secured Offer Letter in Cyber Security Hackathon Merit Selection
-
